

# APPOINTMENTS

ETHAN JONES / Forrest Huff

The sketch shows a mobile app interface with a header bar containing a home icon and links to Home, About, FAQ, and Events. Below the header is a section titled 'APPOINTMENTS'. Under this section is a list of 'Services Offered' with four wavy lines representing service names. Below the list is the text '...AND SO ON...'. At the bottom of the appointments section is a 'SET UP AN APPOINTMENT' form. The form has four input fields: 'NAME', 'Desired Service', 'email', and 'TIME'. Below these fields is a larger box labeled 'ADDITIONAL INFO'. At the very bottom of the app is a circular home button.

Simple header

List of Services.  
Maybe include  
description under  
or when you  
click on one

A place to fill in  
info for an  
appointment.

Desired service  
box could be a  
dropdown and  
date/time could  
open a calendar.
